Maintenance Updates for Drupal

Why do I need to update my site if it just works?

Keeping your website up-to-date is imperative from the security point of view. An out-of-date site is an incentive and an opportunity for malicious users.

How does this service works?

At Atenea Tech we take care of keeping your Drupal site updated with the latest versions of contributed and core modules.

We analyze your site by determining the level of risk and the appropriate updates for your particular case. We offer you the update package that best suits your type of site.

Once hired, we take care of managing the notices that affect you, depending on the components installed on your site. When an update is necessary, we first carry it out on a replica of your site on our test servers, and once its update is verified, we move it to your production site.

Are you interested in this service?

At Atenea tech we have 10 years of experience in the development and maintenance of websites with Drupal.If you are interested in this service, contact us at **+34 935 510 686** or by email at **hola@ateneatech.com**
